

Quarterly Division Award
Public Works Department
Engineering Division

During the past several months, the Engineering Division of the Public Works Department has had the misfortune of being exceptionally short-handed for various reasons. I fully understand the City prides itself in doing more with less. With that in mind, I would like to nominate the Engineering Technician Staff for their hard work and dedication over and above expectations.

The five Engineering Technicians are responsible for hundreds of infrastructure inspections weekly. During the past several months, approximately 2700 Nuclear Density Tests have been performed, 600 Excavation Inspections, 150 Stormwater Inspections, 250 Development Inspections, 300 project inspections, 73 citations (ordinance violations) issued, among several additional duties. These Technicians have performed at a very high standard and with true professionalism. They have postponed vacations, come in during off hours, whatever was necessary to get the job done. They have received full confidence and praise from everyone associated with our Engineering Operations Staff.

Our entire engineering staff does a great job helping out whenever the need arises, with no complaints. It's this type of division unity, teamwork and dedication that allows the Engineering Division to continue functioning effectively.
